

Upgrade Solution

What is a Commander SE ?

The Commander series was a digital PWM AC motor speed control manufactured by Control Techniques from approximately 2000 to 2008. It was available in several models that could control 3-phase motors from 1/3 to 50HP and accept a line voltage of 230V to 480V +/-10%.

What replaces the Commander SE ?

Our Commander SK series can replace the Commander SE series functionality. The Commander SK series offer many more internal and external options and can be setup using your Laptop PC. No pots to adjust or jumpers to set. Software for the Commander SK is free!

* (If Commander SE was using positive logic some adjustment may be required)
