

## **Upgrade Solution**

### **What is the DC400 ?**

The DC400 were DC drives marketed by Safronics. These drives would cover applications from 25-1000A. The DC400 was often part of a **RetroPak** ( drive mounted on a panel with input fusing, input contactor, blower motor starter etc ) or **StandardPak** ( drive mounted in enclosure with various options )

### **Get DC400 Manual**

### **What replaces the DC400?**

We generally replace the DC400 functionality with either our Mentor II or Quantum III Digital DC Drive or with our DC StandardPak ( Mentor II on a panel ). Our Mentor II or Quantum III drives can be setup using your Laptop or PC. Software for these drives is free!
