What is an ES125 ?

The ES125 Electrostat (1251) series was an analog DC motor speed control manufactured by WER Industrial (later Emerson Industrial Controls) from approximately 1975 to 1985. It was used to control DC Shunt Wound or Permanent Motors from 1/4 to 5HP from single phase 120vac or 240vac power.

What replaces the ES125 ?

Our Focus 3 series can replace the ES125 functionality which use state-of-the-art SMT (Surface Mount Technology)- to provide a wealth of features within a compact package. Focus 3 Drives are available in a NEMA 4/12 Enclosure or basic chassis mount models. All models have a range of option kits available to extend functionality even further beyond standard features.
