

Upgrade Solution

What is an ES150ARG ?

The ES150ARG Electrostat (1082) series was an analog regenerative DC motor speed control manufactured by WER Industrial (later Emerson Industrial Controls) from approximately 1975 to 1985. It was used to control DC Shunt Wound or Permanent Motors from 1/4 to 5HP from single phase 120vac or 240vac power.

Focus 3R Family

What replaces the ES150ARG ?

Our Focus 3R series can replace the ES150ARG functionality which use state-of-the-art SMT (Surface Mount Technology)- to provide a wealth of features within a compact package. Focus 3R Drives are available in a NEMA 4/12 Enclosure or basic chassis mount models. All models have a range of option kits available to extend functionality even further beyond standard features. ***If the ES100ARG was used in a Cut-to-Length or Feeder system, contact Technical Support for replacement advisement.***

Complex applications may require review of your original system drawings
