

Upgrade Solution

What is an Electrostat 60 ?

The ES60 (1250) series was an analog DC motor speed control manufactured by WER Industrial (later Emerson Industrial Controls) from approximately 1975 to 1985. It was used to control DC Shunt Wound or Permanent Motors from 1/4 to 2HP from single phase 120vac or 240vac power.

What replaces the ES60 ?

Our Focus 3 series can replace the ES60 functionality which use state-of-the-art SMT (Surface Mount Technology)- to provide a wealth of features within a compact package. Focus 3 Drives are available in a NEMA 4/12 Enclosure or basic chassis mount models. All models have a range of option kits available to extend functionality even further beyond standard features.
