

## **Upgrade Solution**

### **What is a GP10?**

The GP10, marketed by Safronics, was an Open Loop Vector general-purpose inverter with both a variable torque rating and constant torque ratings with 150% overload capacity and was available in both 200-230 VAC (1/4-150 HP) and 380-460 VAC (1/2-800HP). The GP10 was supported by [SAFlink](#) programming software that was purchased separately.

### **What replaces the GP10?**

Our Commander GP20 series can replace the GP10 functionality. Commander GP20's are state-of-the-art Digital Drives that offer many more internal features and a wide variety of option modules for a high degree of application flexibility. Commander GP20's have a powerful on-board PLC capability using ladder logic and a rich function block library using SyPT Lite. Commander GP20's can be setup using your Laptop or PC. Software for the Commander GP20 - CTSOFT and SyPT Lite are free!
