

Upgrade Solution

What is an Electrostat 300RG?

The ES300RG Electrostat (1045) series was a popular 3 phase analog regenerative DC motor speed control manufactured by WER Industrial (later Emerson Industrial Controls) from approximately 1973 to 1983. It could control DC motors from 5HP to 150HP.

What replaces the ES300RG?

We regularly replace ES300RG drives with our Quantum III regenerative series. Quantum III's are state-of-the-art Digital Drives that offer many more internal features and can be setup using your Laptop PC. Software for the Quantum III (called MentorSoft) is free !

To obtain the software for the Quantum III click
